EARMARK DECLARATION

HON. ELTON GALLEGLY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 23, 2009

Mr. GALLEGLY. Madam Speaker, pursuant to the Republican Leadership standards on earmarks, I am submitting the following information regarding earmarks I received as part of H.R. 3293, the Department of Labor, Health and Human Services, Education and Related Agencies Appropriations Act, 2010:

Requesting Member: Representative ELTON GALLEGLY

Bill: H.R. 3293, the Department of Labor, Health and Human Services, Education and Related Agencies Appropriations Act, 2010

Account: Department of Health and Human Services, Health Resources and Services Administration—Health Facilities and Services

Legal Name of Requesting Entity: California State University Channel Islands

Address of Requesting Entity: One University Drive, Camarillo, CA 93012

Description of Request: This request of \$195,220 is to enhance nursing education and practice and improve health care quality by addressing technological competency in pre-licensure nursing education. Three areas of education are highlighted: faculty development, curriculum integration and infrastructure support. First, this project will strengthen faculty preparation in using health information technology through an intense week of training immersion prior to each fall semester and regularly updated thereafter. Second, health information technology theory and practice will be integrated into multiple courses and all levels of the nursing program and supported as a basic practice skill in the simulation lab under the direct supervision of an instructor. Lastly, the existing regional simulation laboratory will be augmented by twelve computerized hospital information systems work stations equipped with information systems used in local facilities. Health information technology integration throughout the curriculum will enable beginning students to tackle technology in their introductory courses and labs and then increasingly use health information technology throughout their nursing educational experience. By integrating health information technology into the nursing program curriculum, CSUCI is ensuring that future nurses will be able to access and retrieve electronic data necessary for technological advances in patient care. The bill provides \$195,000 in funding for this project request.

Requesting Member: Representative ELTON GALLEGLY

Bill: H.R. 3293, the Department of Labor, Health and Human Services, Education and Related Agencies Appropriations Act, 2010

Account: Department of Health and Human Services, Administration on Aging

Legal Name of Requesting Entity: County of Ventura

Address of Requesting Entity: 800 So. Victoria Avenue, Ventura, CA 93009

Description of Request: This request of \$750,000 is for the formation by the County of Ventura Human Services Agency of a multidisciplinary "expert team" to comprehensively address the diverse needs of victims of elder abuse. The team will be comprised of experts and would provide new perspectives in working with the elderly and the training of social workers, mandated reporters, the medical community and all other types of organizations that interface with seniors and the aged community. The unified expert team concept is a practical approach for the development of empirical data and outcomes regarding service strategies, intervention and assessment tools, training, and public awareness information. Existing systems that service the aged population largely rely on intergovernmental partnerships, service referral networks, and community organizations. However, this proposal brings diverse services together under a unified mission to more fully realize the best practice models of expert teams. The bill provides \$654,000 in funding for this project.
